

Task 2:- Creating the data glossary about different variables used in the CDM.

1) STUDY ID

The short name of the clinical study associated with the data set.

E.g., STU001, CT2026, etc.

2) SITE ID

An indicator of the clinic where the subject was recruited that indicates where the data came from

E.g., S01 and S02.

3) SUBJECT ID (SUBJID)

An internal subject identification code that is usually unique for a particular study and the site.

E.g 001, 045, 120.

4) UNIQ ID

A unique ID for a subject that can be used across different studies and sites. It should be a combination of study, site, and subject IDs.

E.g, CT2026-S01-001.

5) AGE

The age of the subject in the years at the time of the screening/enrollment is referred to as age.

The age was calculated for the comparison between young and old subjects.

E.g 42.

6) SEX

The sex of the subject at the time of enrollment.

E.g, Male, Female, Other

7) HEIGHT

The height of the subject in centimeters

E.g., 170 CM

8) WEIGHT

The weight of the subject in kilograms

E.g ,68.5

9) RACE

The subject's race as reported at the trial enrollment

E.g ,Asian, White, Black

10) ETHNICITY

The subject's ethnicity at the time of enrollment. The options include Hispanic and Non-Hispanic

11) COUNTRY

The country where the study site is located indicating the subject's country of origin
E.g., USA, India, Germany

12) REGION

The region associated with the study site.
E.g., North America, Europe, Asia-Pacific

13) VISIT NUMBER

An indicator of the visit sequence number or order in which a subject makes visits to the clinic for the study.
E.g ,1,2,3

14) VISIT DATE

The actual calendar day of a subject's visit to the clinic for the study.
E.g, 2025-04-10

15) TREATMENT GROUP

The treatment group to which the subject was assigned per the study design.
E.g, Placebo, Drug, A, B

16) DOSAGE

The dosage of the treatment administered to the subject as per the study plane.
E.g , 50 mg

17) BMI

The body mass index is calculated using the subject's height and weight and expressed in kg/m².
E.g ,23.6

18) ENROLLMENT DATE

The date on which a subject was enrolled in the study
E.g ,2025-03-15

19) MEDICAL HISTORY

The relevant medical history reported by the subject.
E.g, Hypertension, Diabetes, Asthma

20) CONCOMITANT MEDICATION

The concomitant medication received by the subject throughout the course of the trial.

E.g, Aspirin, Levothyroxine

21) LAB TEST NAME

The name of laboratory tests conducted on the subject

E.g Hemoglobin.

22) LAB VALUE

The specific value obtained from the laboratory test.

E.g 5.8, 0.95.
